D2 : EP 0 933 270 A

D3 : EP 0 251 149 A

D4 : GB 1 237 205 A

D5 : DE 43 21 610 A

D6 : US 5 950 496 A

Novelty and Inventive step:

2. Document D1, which is considered to represent the most relevant state of the art, discloses (the references in parenthesis applying to this document):

Parking brake lever unit for the use in a motor vehicle comprising

a parking brake lever (6) of a plastic material;

a locking unit (4, 2) comprising a pawl (4) which is mounted at the parking brake lever (6), and a ratchet insert (2);

- 2.1 From this, the subject-matter of independent claim 1 differs in that:

the support is of a plastic material, at which the parking brake lever (6) is pivotably supported;

the ratchet insert (2) comprises of a metal and is over moulded within the support.

- 2.2 The subject-matter of claim 1 is therefore novel (Article 33(2) PCT)

3. The **problem** to be solved by the present invention may be regarded as:

increasing the reliability and durability of a lightweight parking brake lever unit.

3.1. The **solution** to this problem proposed in claim 1 of the present application is considered as involving an inventive step (Article 33(3) PCT) for the following reasons:

The closest prior art (D1) shows a parking brake lever unit with a metal support, including a metal ratchet, and gives no hints neither in the direction of a (lighter) full plastic support, nor hints that the ratched (metal) section and the support could be separate (weight reduction and durability).

3.2 Claims 2-15 are dependent on claim 1 and as such also meet the requirements of the PCT with respect to novelty and inventive step.

Industrial applicability:

4. The invention can be used in the automotive industry:
